

CALGROUP

Company Details

Our Company

CALGROUP a new and innovative company which can deliver a fully integrated range of Building and Environmental services to the Commercial, Industrial and Institutional Sectors.

Our aim to deliver added value, compliance and excellent service to our customers. We will do this safely, on time and in an environmentally sustainable way.

CALGROUP is committed to providing an excellent long term service to our customers and strive to exceed expectations on every project.

Our People

Our people are our most important asset. We pride ourselves in the exceptional quality of our staff who are well qualified & trained. We provide excellent training for our staff & always look to develop staff within the business.

Our Vision

Our vision is to be a partner of choice in long term relationships while working collaboratively to deliver project solutions for mutual benefit.

Our Business

We focus on three areas of activity

- The installation of mechanical and electrical Engineering services
- Providing Comprehensive on Site maintenance
- Delivering Comprehensive on site waste management and Environmental programmes

“ Allow me to say thank you Peter. I am most grateful to you for taking me and my list of plumbing problems on. I'm über delighted with Owen and with all that he has done. He's a gentleman and a fine, fine worker. You're lucky to have him on board and I owe Wesley big time for recommending you both. It'll be my great pleasure to do the selfsame, and I shall tell all and sundry how satisfied I am with CalGroup and that I can recomend you without reservation...

Siobhán Dagge Benham

Building Services

CALGROUP Building Services can deliver a fully integrated range of Building services including Mechanical, Electrical, Environmental, Ventilation, Air Conditioning, to the Commercial, Industrial and Institutional Sectors.

We aim to deliver excellent value in engineering projects. We will do this safely, on time and in an environmentally sustainable way.

Services

- Integrated Mechanical & Electrical Services Projects
- Ventilation Systems Installation
- Air Conditioning
- Plumbing Services
- Industrial & Process Pipe Work.
- Design Build
- Environmental & Energy Projects

CALGROUP has developed systems that will deliver excellent quality of service, driven by High caliber site people and strong day to day management input. Robust systems are in place to ensure that subcontract works are carried out to the highest quality and safety standards

Quality Management

Overall Project Quality Assurance and Quality Control will be controlled and supported by the establishment, maintenance and documentation of a formalised quality management system which will comply with the requirements of ISO 9001 : 2000.

Calgroup Engineering will issue a site specific Quality Assurance and Control plan to the CMT for approval and sign-off. The quality plan will incorporate the following sections;

“

We have carried out a number of projects with CALGROUP over the past few years and have found them to be very professional in all aspects of their business. They are particularly strong in delivering pro active service and delivered value engineering to each of their projects. We have no hesitation in recommending them...

”

Brian Homan - MD Homan O'Brien Associates

Building Services

- Scope

“ CALGROUP have carried out a number of small and medium sized projects on campus. We have found them to be competitively priced, well organized and deliver a high degree of customer service...”

PJ Barron - Project Manager UCD

Maintenance

At CALGROUP we offer a planned maintenance service. We have the technical expertise and are well placed to meet your maintenance requirements.

We can assess and review your building and advise on a maintenance plan. We offer a full FM (Facilities Management) service that can be tailored to suit individual client requirements. Not only do we maintain your current systems but we advise on the current legislative standing with respect to less-able access, life safety systems and energy efficiency.

Maintenance related activities will be included within your specific Maintenance Schedule. Here we will generate an annual plan that will list a detailed breakdown of services and the frequency of visits per service per year.

Our staff offer advice on existing systems that may require refurbishment or modification and make recommendations to resolve problems.

We supply a range of maintenance services including but not limited to the following:

- Environmental/Health & Safety/Sustainability Consultancy
- Electrical Installation
- PAT Testing
- Sanitary Disposal
- Lighting and Lighting Control Systems
- Lifts and Escalators
- Thermo graphical Imaging
- Solid Waste Removal and Disposal
- Building Management System (BMS) and Energy Building Management System (EBMS)
- Mechanical Installation
- HVAC (heating, ventilation, and air conditioning)
- Life Safety Systems (Fire Alarm, Lifts, Emergency Lighting, Emergency Generators, Sprinkler, Fire Extinguishers etc.)

“

We confirm that Calgroup Engineering Ltd. of Unit 11, Ballywaltrim Business Park, Bray Co. Wicklow have worked with this office recently.

The most recent project that they have worked on with J.V. Tierney & Co. is the complete Mechanical services installation at S.E.K. International School, Co. Wicklow, where they carried out their remit in a very professional manner.

Their overall performance has been very satisfactory and the quality of their work has been very good. We would have no hesitation in recommending Calgroup Engineering for further projects...

Kevin Byrne - JV Tierney & Co

”

Environmental

CALGROUP Environmental provides a comprehensive on site Environmental and waste Management program to commercial and Industrial Customers.

- Reduce waste and utility costs
- Increase recycling and reuse rates
- Manage all waste streams arising incl general, haz, recyclable, specialised
- Improve level of Services
- Provide detail reporting and compliance
- Provide full end of life solution for each stream

Our programmes are Implemented by our on site Services team of highly qualified personnel that can manage the waste and utilities on your site for you, allowing you to concentrate on your core business. As Site Service Representatives (SSR) these people ensure that all waste generated on-site is appropriately managed and disposed of, including completion of reports, labeling and tracking of waste, collection of disposal certificates and entering data onto customers systems (should they so wish).

With a SSR have the benefit of direct face-to-face daily contact with a trained waste manager who can deal with waste issues that may arise quickly and professionally Furthermore, you will only have to deal with one company to manage your waste.

Depending on your requirements and waste volumes and types generated the TSRs can spend from a half day a week up to permanently being on-site managing your waste.

Environmental

Our programmes can deliver

- Substantial waste disposal cost savings
- Enables full compliance to Regulations
- Deliver value return on Particular waste streams
- Reporting at a company and project level
- Includes measurement of waste arisings and their management routes
- Benchmarks for forecasting your waste arisings
- Site specific programmes
- High level of Service
- Suitable for all types of Industry

If you wish us to carry out a site survey and preliminary proposal Please contact us Today
